

PRODUCT REVIEW

PRISMA—E3350

Just received my new Prisma e3350 system and I couldn't be happier. I'm using it with my Macbook Pro and the results are phenomenal. Apart from looking so cool, the frequency response is incredible with very natural-sounding mid's; crisp, clean highs and a tight, punchy low-end. I especially like the down-firing sub-woofer. The volume controllers are super handy and the power output is perfect for a near-field desktop system. I have even started using it to A/B my Pro Tools mixes. Easily the best desktop system I've had. Thanks for a great product!
