WD 6TB My Book Studio Edition II
Creative types who work with large HD video, photos and audio files will love the new My Book Studio Edition II external hard drive from Western Digital - it comes with a massive 6TB of storage. Compatible with Apple's Time Machine backup software, the drive has FireWire 800/400 and USB 3.0 connectivity, plus eSATA, which isn't really an option for Mac users.
RRP: \$719

CleverWraps
While they won't take any hard knocks, these disposable protective sleeves promise to protect iPads, Kindles and other tablets against incidental contact with water, sand, grease, dirt and other harmful materials. CleverWraps are made of crystal clear channel zip closure and re-sealable tape for double protection.

BUILT Portfolio
This Portfolio is BUILT's classic go-to bag when you want to travel with your MacBook, and now there's a size to fit 11"-13in laptops. It's made of neoprene for extra protection, and there's a front exterior pocket for storing accessories or folders. It comes with a removable padded shoulder strap. There are three designs: Basic black, Scatter Dot and City Grid (pictured).
RNP: \$89.95

QuarkXPress 9
It used to be the de facto publishing software until Adobe launched Creative Suite 2 for a fraction of the price. But now QuarkXPress is set for a comeback with the launch of version 9. Among its many features is App Studio, which gives designers a dedicated design environment for creating iPad apps, distributing them through the App Store and then publishing interactive content to those apps. The price is right, too.
RNP: US\$179; upgrade US\$199
